

EXPERT GUIDANCE FROM INCEPTION TO OPERATION

# TURNKEY ELECTRIC CHARGING STATIONS

Electric vehicles (EVs) are set to be half of the vehicles produced by 2030. As driver preferences change to EVs, so will their needs, and EV charging locations will top that list.

As your partners and energy consultants, Power Management and Essential Constructs are ready to help you navigate the complexities of choosing, installing, and operating the right type of EV Charger for your location, and long-term goals. From inception to installation, commissioning, and operation, you can trust our energy experts' guidance.

## HOW WE'LL HELP YOUR DISTRICT:

- We'll help you maximize state, federal and utility incentives currently available for public and private organizations.
- We'll help you determine the costs and potential revenues associated with operating an EV Charging system.
- We'll help oversee installation, and manage the operation of your EV Charging investment.
- A national cooperative contract will be used to procure the equipment and installation
